## FERTILIZATION PROGRAM: ZUCCHINI PRODUCT USE RECOMMENDATIONS

### TRICOBEST

TRICOBEST is a high quality and high soluble concentrate of humic acids, enriched with *Trichoderma harzanium* (strain IABTH01). It has a notable biostimulant effect, enhancing root development and crop vigor. The strain helps solubilize phosphorus and chelate other nutrients, increasing plant availability. Humic acids improve physical and chemical soil properties.

### VIGORTEM S

VIGORTEM S combines a high phosphorus content, humic and fulvic acids, seaweed extract and aminoacids. VIGORTEM S promotes root growth and vigor ensuring crop establishment, and due to humic and fulvic acids, improves physical and chemical soil properties.

### MOLIBOR

MOLIBOR stimulates the early onset of pollen and improves its quality, resulting more viable flowers. MOLIBOR reduces flower abscission, enhancing the setting process.

### LIDEX PREMIUM

LIDEX PREMIUM is a metabolic processes biostimulant that promote crop development and improves flowering and fruit setting, optimizing crop productivity.

### BULITEM PLUS

BULITEM PLUS is a combination of free amino acids, *Ascophyllum nodosum* seaweed extract, macro and microelements. BULITEM PLUS enhances fruit development, producing more homogeneous fruit, and also improves quality and post-harvest durability.
